Surfing the Supply Side

Truitt Bell
President and CEO
Milbar Laboratories

My executive team, including **Gus Bezas**, Senior Vice-President, and **Sharon Johnson**, Executive Vice-President, was expanded in 2005 with the addition of Dr. **Neal Schultz**, a leading Park Avenue Dermatologist, as Senior Vice-President and Clinical Medical Director.

We are the only firm in our industry to have someone of Dr. Schultz's stature and experience working so closely with our scientific team on staff.

This relationship has already resulted in Milbar introducing new cosmeceutical formulations with new complexes of peptides, anti-oxidants and neuro-mechanical signaling chemicals, all at clinical levels.

In 2006, Milbar will be launching new, dermatologically innovative concepts and incubated brands.
